## CLEVER SOLUTION FOR YOUR SWIMMING POOL

Swimming pool enclosure **CHAMPION** is ideal for every garden. It cleverly combines comfort, aesthetics and user-friendly features. Thanks to its discreet look it blends into the surrounding and let stand up your garden, house and pool itself, The enclosure gives the much needed protection of your pool against debris, pollen, dust, leaves etc - it simply becomes a part of your pool care. The telescopic enclosure has a strong but lightweight structure for easy sliding. When you fancy a swim you simply slide the cover off the pool without any hustle or need to remove the often very cumbersome roller cover. The glass like polycarbonate panels provide a perfect view into the pool even when is fully closed. The high-quality structure finishes off the overall look. **CHAMPION** is a perfect little gem in your garden. Swimming pool enclosure **CHAMPION** is always supplied without the possibility of having an entrance door to the pool. This is due to its low height. This type of enclosure is not intended for use in a closed position. Swimming pool enclosure is always supplied without the possibility of having an entrance door to the pool. This is due to its low height. This type of enclosure is not intended for use in a closed position.

**LOCKABLE SECURITY SYSTEM**

**EASY MOVE HANDLE open position**

**EASY MOVE HANDLE closed position**

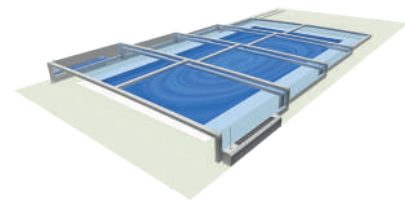

## WHY ALUKOV ENCLOSURES

- 25 years on the market
- Top quality
- 100% after sale service
- Delivery and installation by our highly professional installation crew
- In-house transport

## WHY CHAMPION

- Quick and easy installation
- BESPOKE enclosure
- UNIQUE ultra low enclosure with only 1 leading rail
- Integrated EASY MOVE HANDLE
- The enclosure is designed to be used with motors and remote control by Alukov if required

## ... EVOLUTIONARY MOVEMENT OF SEGMENTS

### TREAT YOURSELF TO FULLY MOTORISED ENCLOSURE

To increase your comfort of operating the pool enclosure even more, we offer you the **CHAMPION** with electric motors. Strong and quiet at the same time. Motors on both sides of the largest segment for smooth opening and closing. The engines are powered by integrated batteries that are automatically charged by built-in solar collectors.

The whole enclosure is guided by a very thin rail on one side of the pool. The remote control is protected by a safety code. Swimming pool enclosure **CHAMPION** is always supplied without the possibility of having an entrance door to the pool. This is due to its low height. This type of enclosure is not intended for use in a closed position. Swimming pool enclosure is always supplied without the possibility of having an entrance door to the pool. This is due to its low height. This type of enclosure is not intended for use in a closed position.

### EASY AND CONVENIENT REMOTE CONTROL

## ADVANTAGES

- Two levels of safety:
  1. Every day program – electromagnetic arrestment against unwanted movement of the enclosure.
  2. Holiday program – when you are not present for a long periods of time at your property. Manual locking system with a mechanical lock.
- Safe 12 voltage
- Drive using a set of two synchronized Engines ALUKOV LINE
- Autonomous system - solar self-charging gel batteries
- Safe movement
